## SYMPOSIUM

The 17th annual RoboCup International Symposium, 1 July 2013, will be held in conjunction with RoboCup 2013. The Symposium represents the core meeting for presentation and discussion of scientific contributions to a variety of research areas related to all RoboCup divisions (RoboCupSoccer, RoboCupRescue, RoboCup@Home, RoboCup@Work and RoboCupJunior). Its scope encompasses, but is not restricted to, research and educational activities within the fields of Robotics and Artificial Intelligence.

Due to its interdisciplinary nature, the symposium offers a unique venue for exploring various and intimate connections of theory and practice across a wide spectrum of research fields. The experimental, interactive, and benchmark character of the RoboCup initiative presents the opportunity to disseminate novel ideas and promising technologies, which are rapidly adopted and field-tested by a large (and still growing) community.
